PROFESSIONAL SUMMARY

- * Software development student with a healthcare background and hands-on experience building mobile apps, websites, and digital products.
- * Skilled in JavaScript, React Native, Expo, HTML, CSS, UI/UX design, wireframing, and responsive web design.
- * Passionate about creating meaningful technology that supports families, caregivers, emotional wellness, and accessibility.

EXPERIENCE

Founder / Developer — BitzaHugs
Family Support Mobile App

2026

- * Designed and built a React Native app focused on routines, emotional check-ins, calming tools, and caregiver support.
- * Created branding, app screens, website, waitlist, privacy policy, support page, and beta testing materials.
- * Improved the app through early feedback with a focus on accessibility, family wellness, and practical daily support.

Aradia: In the Vale of Elarune

Game Design / Web Development

- * Created a cozy dark fantasy life sim concept with website, visual identity, worldbuilding, and pitch materials.
- * Built a responsive promotional website using HTML, CSS, GitHub Pages, and Google Analytics.
